South Australia Forecast

Issued at 4:00 pm CST on Monday 29 June 2026
for the period until midnight CST Friday 3 July 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A low pressure trough over central districts will move southeastwards and slip south of SA from early Tuesday. A series of low pressure systems passing through the Bight during the week will extend cold fronts that will cross over SA through to the end of the week.

Forecast for the rest of Monday 29 June

Isolated showers possible in all districts. Chance of a thunderstorm about the western and pastoral areas. Northerly winds, fresh at times, turning westerly in the far west.

Forecast for Tuesday 30 June

Morning fog possible. Isolated light showers possible about central and eastern districts, and developing about the far west in the evening. Maximum temperatures near average, tending above average in the north. North to northwesterly winds.

Forecast for Wednesday 1 July

Showers and isolated thunderstorms about the west extending eastwards during the day, contracting to the Southern Agricultural Area during the evening. Severe thunderstorms with gusty winds and large hail are possible about parts of the Flinders, Mid North and Riverland districts and southern parts of the North East Pastoral district. Maximum temperatures average to above average, tending below average in the west. Fresh and gusty west to northwesterly winds, moderating in the evening but remaining fresh about the ranges.

Forecast for Thursday 2 July

Showers about the Agricultural Areas, possibly extending into southern pastoral areas. Possible damaging winds about southern coastal districts, along with possible isolated thunderstorms. Maximum temperatures below average. Fresh and gusty west to northwesterly winds, ahead of a west to southwesterly wind change.

Forecast for Friday 3 July

Isolated showers about southern coastal districts. Maximum temperatures below average. Gusty southwesterly winds about the southern coastal districts easing, tending south to southeasterly further north and west.

Cumulative rainfall totals to the end of Friday: less than 2 mm for parts of the North West Pastoral district but broadly 5-15 mm across the state, 15-30 mm possible about central and eastern districts and near the western coast of Eyre Peninsula. Local falls of 30-50 mm possible about Kangaroo Island, Mount Lofty Ranges and the Lower South East.

The next routine forecast will be issued at 4:00 am CST Tuesday.
