South Australia Forecast

Issued at 4:00 am CST on Saturday 23 May 2026
for the period until midnight CST Tuesday 26 May 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A high pressure ridge over the east will begin to weaken as a cold enters the west of the SA early today. This front is expected to reach eastern districts later on Sunday with an associated low pressure system developing off the southern coasts. The low is expected to move across the southeast on Monday then eastwards into NSW by Tuesday with a trough lingering across the south of SA.

Forecast for the rest of Saturday 23 May

Isolated showers in the west, possibly reaching central parts in the evening. Showers becoming scattered about western coasts during the afternoon. Possible thunderstorms about the far west. Maximum temperatures near to below average. Northeast to northwesterly winds, with a south to southwesterly change moving across western districts during the day, fresh at times near the coast.

Forecast for Sunday 24 May

Isolated showers extending statewide, tending scattered about the southern agricultural area and western coasts. Maximum temperatures below average. North to northwesterly winds, ahead of a south to southwesterly change about the west extending throughout by the evening, freshening near the coasts.

Forecast for Monday 25 May

Possible isolated showers across most districts, becoming scattered about windward coasts and ranges. Isolated thunderstorms about the North East Pastoral, West Coast and southern parts of the North West Pastoral district. Maximum temperatures below average. Southwest to southeasterly winds fresh at times about the coast.

Forecast for Tuesday 26 May

Isolated showers across the southern pastorals and agricultural areas, becoming scattered about windward coasts and the south east. Isolated thunderstorms possible over the North East Pastoral District. Maximum temperatures below average. Southwest to southeasterly winds fresh at times about the coast. Cumulative rainfall totals to the end of Tuesday: less than 2 mm about the far northeast, 1 to 5 mm about the northern agricultural area and south of the pastoral districts, increasing to 5 to 15 mm about western coasts and the southern agricultural area. Isolated falls of 15 mm are also possible in the North West Pastoral district with thunderstorms.

The next routine forecast will be issued at 4:00 pm CST Saturday.
