South Australia Forecast

Issued at 4:00 pm CST on Saturday 1 August 2026
for the period until midnight CST Wednesday 5 August 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A high pressure ridge remains for eastern parts of South Australia overnight Saturday, as a cold front moves across the Bight into western parts of the state from overnight Saturday into Sunday. The front moves across the southeast of the state throughout Sunday and early Monday. Another high pressure system moves into the Bight, behind the front, and moves slowly east throughout the week.

Forecast for the rest of Saturday 1 August

Dry. North to northeasterly winds, tending north to northwesterly winds ahead of a south to southwesterly change moving over the southwest.

Forecast for Sunday 2 August

Morning frost for parts of the central and eastern districts, extending north into parts of the Pastoral districts. Isolated showers developing about the Lower Eyre Peninsula during the morning and extending southeast across the Southern Agricultural Area from the afternoon. Maximum temperatures near to below average. West to northwesterly winds ahead of a west to southwesterly change extending across southeastern parts throughout the day. Winds shifting south to southeasterly winds in the north and west during the afternoon.

Forecast for Monday 3 August

Patchy morning frost and fog about parts of the Northern Agricultural Area and southern Pastoral districts. Isolated showers about the southeast, clearing during the evening. Maximum temperatures near to below average. Southwest to southeasterly winds, tending north to northeasterly in the west later.

Forecast for Tuesday 4 August

Possible patchy morning frost about parts of the Eyre Peninsula, and parts of the Pastoral districts. Possible morning fog about the Mid North and Flinders districts. Mostly dry. Maximum temperatures near to below average, tending above average in the west. Northeast to southeasterly winds, tending southwesterly in the southeast until the afternoon.

Forecast for Wednesday 5 August

Possible patchy morning fog about parts of the southeast and frost about parts of the central and eastern districts. Mostly dry. Maximum temperatures near average. Northeast to easterly winds.
Cumulative rainfall totals to the end of Wednesday: Less than 2 mm about the Agricultural Areas. Isolated falls between 5 to 10 mm possible about windward facing coasts and ranges and in the South East.

The next routine forecast will be issued at 4:00 am CST Sunday.
