South Australia Forecast

Issued at 4:00 pm CST on Saturday 29 August 2026
for the period until midnight CST Wednesday 2 September 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A high pressure system south of SA continues extending a ridge across the state, as it moves slowly east over the weekend, to be centred over Victoria by Monday. A cold front is then forecast to move across the state on Tuesday, as another ridge and high quickly push in behind the front on Wednesday.

Forecast for the rest of Saturday 29 August

Dry. East to southeasterly winds, tending southerly in the southeast.

Forecast for Sunday 30 August

Morning fog on and east of the Mount Lofty Ranges, with patchy frost possible about the southeast. Dry and mostly sunny day. Maximum temperatures above average. East to southeasterly winds, fresh at times during late morning in the northeast. Winds tending northeasterly about the west and southerly in the southeast.

Forecast for Monday 31 August

Morning fog and frost patches on and east of the ranges, with possible fog also about parts of the Eyre and Yorke Peninsula. Dry and mostly sunny day. Warmer, with above average maximum temperatures. North to northeasterly winds, tending east to southeasterly in the northeast.

Forecast for Tuesday 1 September

Isolated showers developing about the Agricultural Areas during the day. Maximum temperatures above average. North to northwesterly winds, fresh and gusty about the coastal fringe and the ranges, ahead of a west to southwesterly change extending east across the state throughout the day. Winds tend southeasterly in the northwest from the evening, and remain northwesterly in the far northeast.

Forecast for Wednesday 2 September

Isolated showers about the Southern Agricultural Area. Maximum temperatures below average, tending above average in the north. Northwest to southwesterly winds over the Agricultural Areas, tending southwest to southeasterly further north.

Cumulative rainfall totals to the end of Wednesday: 1 to 5 mm over the Agricultural Areas, increasing 5 to 10 mm in the Lower South East. Localised higher falls are possible, mainly about windward coasts and ranges.

The next routine forecast will be issued at 4:00 am CST Sunday.
