South Australia Forecast

Issued at 4:00 pm CST on Saturday 19 September 2026
for the period until midnight CST Wednesday 23 September 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A high pressure system centred over NSW will extend a ridge westwards over SA during Saturday. A cold front will approach from the west late Saturday then move across SA on Sunday. Another high pressure system will move eastwards across waters to the south during Monday then over Victoria and the Tasman Sea on Tuesday. This high will extend a ridge westwards over SA ahead of a low pressure trough that is expected to move over the far west of SA during Wednesday.

Forecast for the rest of Saturday 19 September

Dry and mostly clear. Northeast to northwesterly winds freshening in the far west.

Forecast for Sunday 20 September

Isolated light showers about the southern agricultural area during the afternoon and evening. Chance of an isolated thunderstorm in the far northwest later. Maximum temperatures above average. North to northwesterly winds becoming fresh and gusty ahead of a southwesterly change extending across the west and south, tending southwest to southeasterly during the evening.

Forecast for Monday 21 September

Chance of an isolated light morning shower about the southern agricultural areas and a possible isolated thunderstorm in the far northwest later. Maximum temperatures below average in the south but above average in the north. South to southeasterly winds, fresh in the northeast during the afternoon.

Forecast for Tuesday 22 September

Cold at first with patchy frost about the agricultural area. Dry and mostly sunny day. Maximum temperatures above average in the north and west but slightly below average elsewhere. Southeast to northeasterly winds. Afternoon sea breezes near the coast.

Forecast for Wednesday 23 September

Cold at first about eastern districts with patchy frost. Isolated showers and possible thunderstorms developing in the far west and in the far northeast corner. Maximum temperatures above average. Southeast to northeasterly winds.

Cumulative rainfall totals to the end of Wednesday: less than 2 mm about the southern agricultural area and in the far west. Possible local falls of 2 to 5 mm with thunderstorms in the far west.

The next routine forecast will be issued at 4:00 am CST Sunday.
