South Australia Forecast

Issued at 4:00 pm CST on Saturday 12 September 2026
for the period until midnight CST Wednesday 16 September 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A trough is approaching from the west and will move across SA on Sunday, as an upper level disturbance moves over the far west later on Sunday. A high pressure ridge will also extend into the state from a high located southwest of WA from late Sunday. A cold front will then slip across southern coasts late Monday and early Tuesday, before the high moves across waters to the south to be centred over Victoria by Thursday.

Forecast for the rest of Saturday 12 September

Dry apart from an isolated shower or thunderstorm in the far southwest. Northwest to northeasterly winds, tending variable in the northeast.

Forecast for Sunday 13 September

Showers and isolated thunderstorms extending across the west and south, clearing from the west throughout the day. Thunderstorms possibly gusty about the eastern districts and possible about the far northwest later. Maximum temperatures above average, tending near average in the southwest. North to northwesterly winds ahead of the change, freshening at times and shifting southwest to southeasterly from the west throughout the day.

Forecast for Monday 14 September

Possible morning fog about the Agricultural Areas and West Coast. Showers and thunderstorms in the far west. Isolated showers developing about southern coastal districts during the afternoon and extending over the remainder of the Southern Agricultural Area from the evening. Maximum temperatures above average in the northeast, tending near average elsewhere. Southwest to southeasterly winds, freshening about the coast later.

Forecast for Tuesday 15 September

Isolated showers and thunderstorms in the far northwest, with isolated light showers possible about the Southern Agricultural Area clearing by the afternoon. Maximum temperatures below average. South to southeasterly winds, fresh about the coast and central and northern inland parts.

Forecast for Wednesday 16 September

Dry and mostly sunny. Maximum temperatures below average. East to southeasterly winds, fresh and gusty in the northeast.

Cumulative rainfall totals to the end of Wednesday: less than 2 mm about the Northern Agricultural Area, reaching up to 2 to 5 mm about the Southern Agricultural Area and 5 to 10 mm about southern coasts, ranges and the South East. Local heavier falls are possible between 5 to 15 mm. 5 to 15 mm possible about parts of the west, with local heavier falls between 20 to 40 mm possible in the far west.

The next routine forecast will be issued at 4:00 am CST Sunday.
