## South Australia Forecast

Issued at 4:00 am CST on Friday 12 June 2026  
for the period until midnight CST Monday 15 June 2026.

### Warning Information

For latest warnings go to [www.bom.gov.au](http://www.bom.gov.au), subscribe to RSS feeds, call 1300 659 210\* or listen for warnings on relevant TV and radio broadcasts.

### Weather Situation

A high pressure system in the Tasman Sea maintains a ridge over SA. A cold front will move across the Bight on Friday with a weak high pressure system developing over southern Australia over the weekend. A trough of low pressure moves into the far west on Monday as an associated low pressure system moves into the Bight.

### Forecast for the rest of Friday 12 June

Early morning showers about the coastal fringe. Showers increasing in the far west, tending to rain and extending over western coasts and Kangaroo Island during the evening. Maximum temperatures above to well above average. Fresh and gusty northeast to northwesterly winds ahead of a west to southwesterly change moving across the far west late in the evening. Strong at times about the coast.

### Forecast for Saturday 13 June

A band of rain about the West Coast and far west moving across the agricultural area during the day and contracting to south of the pastorals and Flinders districts in the evening. Maximum temperatures near average grading to well above average in the northeast and below average about the far west. North to northwesterly winds ahead of a south to southwesterly change extending into the North East Pastoral district during the afternoon.

### Forecast for Sunday 14 June

Isolated showers across the pastoral districts, becoming more frequent about the North West Pastoral during the day and extending into the West Coast during the evening. Morning fog patches on and east of the ranges. Possible thunderstorms about the far west later. Maximum temperatures near average grading to above average in the north and below average about the far west. Light winds tending southeast to northeasterly.

### Forecast for Monday 15 June

Showers about the south of the North West Pastoral district and the West Coast, tending to patchy rain and extending into central and southeastern districts during the day. Possible thunderstorms about the west. Maximum temperatures near average grading to above average in the north. North to northeasterly winds ahead of a west to southwesterly change moving across the far west late in the evening. Cumulative rainfall totals to the end of Monday: mostly dry about the far north and northeast. 2 to 10 mm about the remaining parts of the pastoral districts and Flinders. Increasing to 10 to 20 mm about the West Coast and agricultural area. Isolated falls of 20 to 40 mm about the West Coast and Kangaroo Island.

The next routine forecast will be issued at 4:00 pm CST Friday.
