South Australia Forecast

Issued at 4:00 pm CST on Tuesday 7 July 2026
for the period until midnight CST Saturday 11 July 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A high pressure system centred near Tasmania extends a ridge over SA. A weak trough will remain over northern SA, slowly moving east later this week ahead of a cold front moving across the Bight.

Forecast for the rest of Tuesday 7 July

Isolated showers developing about central parts of the pastoral districts, extending into the West Coast district later this evening. East to southeasterly winds.

Forecast for Wednesday 8 July

Morning fog and frost patches about the agricultural area. Showers about central parts of the pastoral districts and the West Coast district. Maximum temperatures near to below average. East to southeasterly winds.

Forecast for Thursday 9 July

Morning fog patches about the agricultural area and in the west. Showers about central parts of the pastoral districts and the West Coast district, contracting to the North East Pastoral district during the evening. Possible thunderstorms in the far northeast in the afternoon. Maximum temperatures near to below average. East to southeasterly winds.

Forecast for Friday 10 July

Morning fog patches about the agricultural area and in the pastoral districts. Showers about the North East Pastoral district easing during the afternoon. Isolated showers developing about the agricultural area and west coast during the evening. Maximum temperatures near to below average. Light winds, tending northeast to northwesterly during the day.

Forecast for Saturday 11 July

Showers about the agricultural area, most likely during the day. Maximum temperatures near average. West to northwesterly winds, fresh about the coasts and ranges. Winds tending west to southwesterly in the west in the evening.

Cumulative rainfall totals to the end of Saturday: 3 to 5 mm east of a line from Coober Pedy to Ceduna, increasing to 5 to 15 mm about the far southeast, the North East Pastoral and southern parts of the North West Pastoral districts. Isolated falls of 15 to 25 mm are possible in the North East Pastoral district.

The next routine forecast will be issued at 4:00 am CST Wednesday.
