South Australia Forecast

Issued at 4:00 am CDT on Thursday 15 October 2026
for the period until midnight CDT Sunday 18 October 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A high pressure system moves southeast across waters to the south of SA, reaching the Tasman Sea later on Thursday and extends a ridge over the state until early next week. Another trough moves into the far west on Friday before weakening over the weekend.

Forecast for the rest of Thursday 15 October

Possible early morning patchy frost about the southeast. Dry at first. Isolated showers and possible thunderstorms developing in the far west from the afternoon and evening. Thunderstorms possibly severe with risk of damaging winds, large hail and heavy rainfall. Maximum temperatures near average, grading to below average in the northeast. Southeast to northeasterly winds, with local afternoon sea breezes.

Forecast for Friday 16 October

Showers and thunderstorms in the west, contracting to the far north during the afternoon and clearing from the evening. Maximum temperatures near to above average about coastal districts, grading to below average about the northeast. Southeast to northeasterly winds, with local afternoon sea breezes.

Forecast for Saturday 17 October

Isolated showers and possible thunderstorms about the far northwest during the afternoon and evening. Possible showers near the eastern border. Maximum temperatures above average about the south and west, tending near average in the northeast. East to northeasterly winds, tending southeasterly in the northeast, with local afternoon sea breezes.

Forecast for Sunday 18 October

Showers and thunderstorms developing in the west later. Possible showers near the eastern border. Maximum temperatures above average, grading to well above average about the west coast and tending near average in the northeast. East to northeasterly winds, with local afternoon sea breezes. Winds tending north to northwesterly in the far west during the afternoon, shifting southeast to easterly during the evening. Cumulative rainfall totals to the end of Sunday: 1 to 5 mm about the North East Pastoral, increasing to 2 to 10 mm about the North West Pastoral. Possible falls of 10 to 20 mm about the north and west, with a chance of isolated falls of 20 to 40 mm. Less than 2 mm possible elsewhere.

The next routine forecast will be issued at 4:00 pm CDT Thursday.
