South Australia Forecast

Issued at 4:00 pm CST on Wednesday 8 July 2026
for the period until midnight CST Sunday 12 July 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A high pressure system centred near Tasmania extends a ridge over SA. A weak trough over northern SA will move slowly eastwards later today and during Thursday. A cold front will move across the south during Saturday followed by another front near southern coasts on Sunday.

Forecast for the rest of Wednesday 8 July

Showers about central parts of the pastoral districts and the West Coast district. Chance of a thunderstorm in the far north during the afternoon. Southeast to northeasterly winds.

Forecast for Thursday 9 July

Morning fog patches about the agricultural area and in the west. Early frost in the South East districts. Showers about central parts of the pastoral districts and the West Coast district, mostly contracting to the North East Pastoral district during the evening. Chance of a thunderstorm in the far northeast. Maximum temperatures below average. Southeast to northeasterly winds.

Forecast for Friday 10 July

Morning fog patches about the agricultural area and in the pastoral districts and possible frost patches about the South East districts. Showers about the North East Pastoral district easing during the afternoon. Isolated showers developing about the agricultural area and west coast late afternoon and evening. Maximum temperatures below average. Light winds, tending northeast to northwesterly during the day.

Forecast for Saturday 11 July

Isolated showers about the North East Pastoral district contracting eastwards to mostly clear by early afternoon. Showers extending across the agricultural area during the morning and early afternoon and isolated showers about the far south of the pastoral districts. Maximum temperatures mostly below average. North to northwesterly winds freshening ahead of a west to southwesterly change.

Forecast for Sunday 12 July

Showers about the southern agricultural area and isolated showers near the west coast and about the northern agricultural area. Maximum temperatures mostly below average. West to southwesterly winds easing in the evening and tending west to northwesterly.

Cumulative rainfall totals to the end of Sunday: 2 to 5 mm east of a line from Coober Pedy to Ceduna, increasing to 5 to 15 mm about the southern agricultural area and parts of the pastoral districts north of about Ceduna to Leigh Creek. Isolated falls of 15 to 25 mm are possible about central parts of the pastoral districts in the far north and near southern coasts.

The next routine forecast will be issued at 4:00 am CST Thursday.
