## South Australia Forecast

Issued at 4:00 pm CST on Tuesday 15 September 2026  
for the period until midnight CST Saturday 19 September 2026.

### Warning Information

For latest warnings go to [www.bom.gov.au](http://www.bom.gov.au), subscribe to RSS feeds, call 1300 659 210\* or listen for warnings on relevant TV and radio broadcasts.

### Weather Situation

A high pressure ridge will be persistent over SA during the week, with a high moving across waters to the south to be centred over Victoria later Thursday and then over eastern NSW later Friday. The next cold front is likely to approach from the west late Saturday and move across SA on Sunday.

### Forecast for the rest of Tuesday 15 September

Isolated showers in the far northwest clearing overnight. South to southeasterly winds, fresh about the coast and northern inland parts.

### Forecast for Wednesday 16 September

Cold at first with patchy frost about the Flinders Ranges and adjacent areas. Dry and mostly sunny day. Maximum temperatures below average. East to southeasterly winds, fresh and gusty in the northeast during the day.

### Forecast for Thursday 17 September

Cold at first with patchy fog and frost in parts, mainly on and to the east of the ranges. Dry and mostly sunny day. Maximum temperatures below average, tending above average in the far southwest. Southeast to northeasterly winds, fresh and gusty in the northeast during the day.

### Forecast for Friday 18 September

Cold at first with patchy frost in parts of the east. Dry and mostly sunny day. Maximum temperatures above average. East to northeasterly winds, tending north to northwesterly about the southeast.

### Forecast for Saturday 19 September

Dry and mostly sunny day. Slight chance of a shower or thunderstorm about the far southwest later. Maximum temperatures above average. Northeast to northwesterly winds ahead of a change, freshening in the far west during the day. Winds freshening about the coast and shifting west to southwesterly from the west during the night.

Cumulative rainfall totals to the end of Saturday: generally less than 2 mm across the Agricultural Areas. 5 to 10 mm possible in the far northwest, with local falls of 15 to 30 mm possible.

The next routine forecast will be issued at 4:00 am CST Wednesday.
