

TOP PRIORITY FOR IMMEDIATE BROADCAST

Coastal Hazard Warning for ABNORMALLY HIGH TIDES

For people in Yorke Peninsula, Kangaroo Island and parts of Adelaide Metropolitan, Mount Lofty Ranges, Lower Eyre Peninsula, Eastern Eyre Peninsula, Mid North and Flinders districts.

Issued at 4:31 pm Tuesday, 2 June 2026.

Abnormally high tides for Gulf coasts.

Weather Situation: A deep low-pressure system to the southeast continues tracking eastwards towards Bass Strait, bringing strong to near gale-force westerly winds and elevated sea levels.

ABNORMALLY HIGH TIDES which may lead to sea water flooding of low-lying coastal areas are possible about the Spencer Gulf, Gulf St Vincent and northern Kangaroo Island. Tides are likely to rise well above the normal high tide mark during this afternoon and evenings high tides.

Elevated sea levels have since peaked about western and southeastern coasts.

Locations which may be affected include Port Lincoln, Port Pirie, Port Wakefield, and Adelaide Metro Beaches.

Coastal Hazards are no longer occurring in the West Coast, Murraylands, Upper South East and Lower South East districts and the warning for these districts is CANCELLED.

The State Emergency Service advises the following:

- * Unusually high tides are dangerous to swimmers, surfers and rock fishers. Stay away from coastal areas until conditions subside.
- * Know your limitations around beaches, tidal rivers and creeks. Monitor warnings and conditions. Supervise children at all times.
- * If you have a moored boat or watercraft, check that your mooring and lines are secure.
- * Be aware that unusually high tides could cause flooding at the coast.
- * You should never walk, ride or drive through floodwater.

The next Coastal Hazard Warning will be issued by 11:00 pm ACST Tuesday.
