## South Australia Forecast

Issued at 4:00 pm CST on Sunday 13 September 2026  
for the period until midnight CST Thursday 17 September 2026.

### Warning Information

For latest warnings go to [www.bom.gov.au](http://www.bom.gov.au), subscribe to RSS feeds, call 1300 659 210\* or listen for warnings on relevant TV and radio broadcasts.

### Weather Situation

A high pressure ridge builds across much of SA, as a cold front slips across southern coasts late Monday into early Tuesday. A high pressure system will then move across waters to the south throughout the week to be centred over Victoria by Thursday. A low pressure trough in the interior of WA may extend into far western parts at times before weakening by late Tuesday.

### Forecast for the rest of Sunday 13 September

Isolated showers and thunderstorms clearing from the eastern districts but possible in the far northwest. West to southwesterly winds, tending northwest to westerly in the northeast and south to southeasterly in the west.

### Forecast for Monday 14 September

Morning fog about parts of the Agricultural Areas and West Coast. Showers and isolated thunderstorms in the far northwest. Isolated showers developing about southern coastal districts during the afternoon and extending over the remainder of the Southern Agricultural Area during the night. Maximum temperatures above average in the northeast, tending near average elsewhere. Southwest to southeasterly winds, freshening about the coast during the night.

### Forecast for Tuesday 15 September

Isolated showers and thunderstorms in the far northwest, with isolated light showers possible about parts of the Agricultural Areas and Mid North district clearing by the afternoon. Maximum temperatures below average. South to southeasterly winds, fresh about the coast and central and northern inland parts.

### Forecast for Wednesday 16 September

Possible patchy morning frost about the Flinders Ranges. Dry and mostly sunny. Maximum temperatures below average. East to southeasterly winds, fresh and gusty in the northeast.

### Forecast for Thursday 17 September

Possible patchy morning frost on and east of the ranges, with patchy fog also possible in the southeast. Dry and mostly sunny. Maximum temperatures below average, tending above average in the southwest. East to northeasterly winds, fresh and gusty in the northeast during the day.

Cumulative rainfall totals to the end of Thursday: less than 2 mm about the Northern Agricultural Area, reaching up to 2 to 5 mm about the Southern Agricultural Area and 5 to 10 mm about southern coasts, ranges and the South East. Local heavier falls are possible between 5 to 15 mm. 5 to 15 mm possible in the far west, with local heavier falls between 20 to 40 mm possible.

The next routine forecast will be issued at 4:00 am CST Monday.
