South Australia Forecast

Issued at 4:00 pm CST on Tuesday 21 July 2026
for the period until midnight CST Saturday 25 July 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A trough crosses South Australia on Tuesday evening, followed by a series of weak cold fronts that cross the south of the State during Wednesday. A ridge of high pressure will build over the west of the State from later Wednesday, with the high centre expected to cross South Australia on Friday and Saturday.

Forecast for the rest of Tuesday 21 July

Dry before showers develop over Kangaroo Island and the far southeast coast during the evening. North to northwesterly winds, shifting southwest to southerly in the west during the evening.

Forecast for Wednesday 22 July

Areas of morning fog in the west. Isolated showers extending through the agricultural districts during the morning, before mostly contracting to coastal areas in the evening. Small hail about the southeast coast during the evening. Dry otherwise. Maximum temperatures above average about pastoral districts, tending below average in the agricultural districts. Southwest to southerly winds, fresh at times about the southeast coast.

Forecast for Thursday 23 July

Isolated showers about the southeast and coastal areas, with small hail about the far southeast coast during the morning. Showers easing later in the day. Dry elsewhere. Maximum temperatures generally below average. Southwest to southerly winds, fresh at times about the southeast coast and the pastoral districts.

Forecast for Friday 24 July

Areas of morning frost through parts of the Mid North and Flinders Districts. Possible light showers about the southeast and coastal areas, most likely near the far southeast coast. Dry otherwise. Maximum temperatures below average. West to southwesterly winds in the south. Southeasterly winds over the pastoral districts, fresh at times in the far north.

Forecast for Saturday 25 July

Patchy morning fog east of the ranges. Possible light showers about the southeast and coastal areas, most likely near the far southeast coast. Dry otherwise. Maximum temperatures below average. West to southwesterly winds in the south. East to southeasterly winds in the north.
Cumulative rainfall totals to the end of Saturday: generally less than 5 mm possible about southern agricultural area and of less than 2 mm possible about northern agricultural areas. Isolated falls 5-10mm possible about the Mt Lofty Ranges and the southeast coast.

The next routine forecast will be issued at 4:00 am CST Wednesday.
