South Australia Forecast

Issued at 4:00 pm CST on Wednesday 1 July 2026
for the period until midnight CST Sunday 5 July 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A series of low pressure systems passing over waters to the south will extend cold fronts that will cross over SA through to the end of the week. A high pressure system is then forecast to move into the Bight from late Friday and extend a ridge across the state over the weekend, as it slowly moves southeastwards towards Tasmania.

Forecast for the rest of Wednesday 1 July

Isolated showers and thunderstorms about the Agricultural Area, increasing about Lower Eyre Peninsula and Kangaroo later during the evening. Fresh and gusty west to northwesterly winds, moderating in the evening but remaining fresh and gusty about coastal parts and the ranges.

Forecast for Thursday 2 July

Showers about the Southern Agricultural Area, possibly extending further north into the pastoral areas. Isolated thunderstorms about southern coastal districts. Possible small hail about the Lower South East. Maximum temperatures below average. Fresh and gusty west to northwesterly winds, ahead of a west to southwesterly wind change in the evening. Strong at times about southern coastal districts with damaging winds possible.

Forecast for Friday 3 July

Isolated light showers about Agricultural Area, most likely about the Lower South East. Showers also possible about the far north. Maximum temperatures below average. Gusty southwesterly winds about the southern coastal districts easing, tending south to southeasterly further north and west.

Forecast for Saturday 4 July

Isolated light showers about the Agricultural Area, most likely about windward coasts and ranges. Showers also possible about the far north. Maximum temperatures below average. South to southeasterly winds, tending southwesterly about the southeast.

Forecast for Sunday 5 July

Isolated light showers about coastal parts. Maximum temperatures below average. Southeast to northeasterly winds.

Cumulative rainfall totals to the end of Sunday: less than 2 mm for parts of the North West Pastoral district but broadly 5-15 mm across the state, 15-30 mm possible about Southern Agricultural Area and near the eastern border of the North East Pastoral district. Local falls of 30-50 mm possible about Kangaroo Island, Mt Lofty Ranges and the Lower South East coast.

The next routine forecast will be issued at 4:00 am CST Thursday.
