South Australia Forecast

Issued at 4:00 pm CST on Saturday 27 June 2026
for the period until midnight CST Wednesday 1 July 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A high pressure system centred over Tasmania extends a ridge over SA. The high and ridge will move eastwards on Sunday and a low pressure trough is expected to reach the far west of the state on Sunday. The trough will slip southeastwards early next week, followed by a cold front mid week.

Forecast for the rest of Saturday 27 June

Isolated showers developing in the far west, mainly dry elsewhere. East to northeasterly winds.

Forecast for Sunday 28 June

Morning fog patches about eastern districts. Isolated showers about the west extending to central districts during the afternoon and evening. Chance of a thunderstorm about the far west. Maximum temperatures generally below average, though tending to above average in the far northeast. North to northeasterly winds, fresh at times.

Forecast for Monday 29 June

Isolated showers possible in all districts, though most likely about the northeast. Chance of a thunderstorm about the west and in the far northeast. Maximum temperatures near or slightly below average. Northerly winds, fresh at times, turning westerly in the far west.

Forecast for Tuesday 30 June

Morning fog patches. Isolated showers possible about central and eastern districts, and developing about the far west later. Maximum temperatures near average though tending to above average above the north. North to northwesterly winds fresh at times.

Forecast for Wednesday 1 July

Showers and isolated thunderstorms about the west extending eastwards during the day. Showers contracting to coastal parts during the evening. Maximum temperatures below average about the west and tending to above average above the northeast. Fresh and gusty north to northwesterly winds, tending westerly in the west.

Cumulative rainfall totals to the end of Wednesday: broadly 2-10 mm. Isolated falls of 10-20 mm are possible about parts of Kangaroo Island, southern Fleurieu Peninsula, western coasts and the pastoral districts. Falls of 30-40 mm possible with thunderstorms about the northeast.

The next routine forecast will be issued at 4:00 am CST Sunday.
