South Australia Forecast

Issued at 4:00 pm CST on Sunday 27 September 2026
for the period until midnight CST Thursday 1 October 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A trough over central Australia will weaken and contract into WA as a ridge of high pressure extends across southeastern SA. The high pressure system is expected to drift into the Tasman Sea by Tuesday as the trough in WA begins to re-extend over western SA on Tuesday, pushing into the state on Wednesday and reaching the far northeast on Thursday.

Forecast for the rest of Sunday 27 September

Dry apart from the slight chance of a shower and thunderstorm near the WA border. Southeasterly winds in the south, freshening near the coast, tending east to northeasterly in the north and far west.

Forecast for Monday 28 September

Mostly dry, with isolated showers and thunderstorms developing in the far west during the late afternoon. Maximum temperatures above to well above average. East to northeasterly winds, fresh in the north.

Forecast for Tuesday 29 September

Isolated showers and thunderstorms in the far west, extending to the Eyre Peninsula and southern coasts in the late evening. Maximum temperatures well above average. Northeast to northwesterly winds, fresh in the north at times ahead of southwesterly change extending across the west in the evening.

Forecast for Wednesday 30 September

Isolated showers and thunderstorms developing across the agricultural areas, North West Pastoral and West Coast, becoming scattered in the far west. Maximum temperatures above average in the south and west, grading to well above average in the north. Light and variable winds in the south, tending northwest to northeasterly in the north.

Forecast for Thursday 1 October

Scattered showers and isolated thunderstorms possible across most districts, remaining dry in the far northeast. Maximum temperatures below average in the west, grading to above average in the east. Fresh north to northwesterly winds in the northeast ahead of west to southwesterly change extending inland. Cumulative rainfall totals to the end of Thursday: Dry in the far northeast. Generally, 2 to 10 mm elsewhere with falls of 5 to 15 mm through the southern agricultural areas. Higher isolated totals of 15 to 25 mm possible about parts of the far west, Kangaroo Island and the Lower South East, particularly with thunderstorms.

The next routine forecast will be issued at 4:00 am CST Monday.
