South Australia Forecast

Issued at 4:00 am CST on Saturday 25 July 2026
for the period until midnight CST Tuesday 28 July 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A high pressure system centred over the Bight will slowly drift northeastwards today while a weak trough embedded in the southwesterly flow around the high will clip the southeast of the State during the morning. The high will move north over South Australia on Sunday and eastern states early next week, with a cold front pushing over the west of the State on Monday and move over remaining parts on Tuesday.

Forecast for the rest of Saturday 25 July

Patchy morning frost about the northern agricultural area, Flinders district and parts of the Pastoral districts. Showers extending over the southern agricultural area during the morning then becoming isolated during the evening. Chance of an isolated shower about the northern agricultural area. Maximum temperatures generally below average. Northwest to southwesterly winds in the south, fresh at times near southern coasts. East to southeasterly winds in the north.

Forecast for Sunday 26 July

Morning frost patches about the northern agricultural area, Flinders district and parts of the Pastoral districts. Morning fog patches about Eyre Peninsula and on and east of the ranges. Isolated light showers about the southern agricultural area, mostly about southern coasts and ranges. Maximum temperatures near average about southeastern parts but below average elsewhere. West to northwesterly winds in the south but generally light and variable winds in the north.

Forecast for Monday 27 July

Morning frost patches about the northern agricultural area, Flinders district and parts of the Pastoral districts. Morning fog patches about the agricultural area. Dry apart from possible showers about southern coastal districts during the morning and again in the evening. Maximum temperatures below average in the far north but near average elsewhere. North to northwesterly winds freshening in the south, then shifting west to southwesterly in the west later.

Forecast for Tuesday 28 July

Showers about the southern agricultural area, extending to the northern agricultural area and possibly the south of the Pastoral districts during the day. Maximum temperatures near average in the northeast, grading to below average elsewhere. North to northwesterly winds, shifting southwest to southerly from the west during the day, fresh at times about the southeast.

Cumulative rainfall totals to the end of Tuesday: Less than 2 mm about the northern agricultural area and south of the Pastoral districts, increasing to 2 to 10 mm about the southern agricultural area, with falls of 5 to 15 mm possible about the Mount Lofty Ranges, western coasts of Kangaroo Island and the Lower South East districts, with isolated falls of 10 to 20 mm possible.

The next routine forecast will be issued at 4:00 pm CST Saturday.
