# South Australia Forecast

Issued at 4:00 am CDT on Thursday 5 November 2026
for the period until midnight CDT Sunday 8 November 2026.

## Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

## Weather Situation

A high pressure system moving in to the Bight extends a ridge over SA. The high moves through the Bight and over the eastern states on Friday, as a cold front clips the southeast on Friday. Another high pressure system moves over waters to the south of SA over the weekend. A developing low pressure system over WA moves closer to the border with SA on the weekend.

## Forecast for the rest of Thursday 5 November

Possible light morning showers about windward coasts and ranges. Maximum temperatures below average. Generally southwest to southeasterly winds, fresh and gusty in the northeast during the morning.

## Forecast for Friday 6 November

Possible morning fog patches about Eyre Peninsula. Showers about windward coasts, extending across the southern agricultural area during the afternoon and evening. Possible showers or thunderstorms developing about the far west late. Maximum temperatures below average about central and eastern districts, grading to above average in the west. Light winds, shifting north to northwesterly ahead of a fresh southwest to southeasterly change extending throughout during the afternoon and evening.

## Forecast for Saturday 7 November

Possible light morning showers about the agricultural area. Possible showers or thunderstorms in the west. Maximum temperatures above average in the northwest and far north grading to below average elsewhere. Moderate to fresh southwest to southeasterly winds, shifting east to northeasterly in the west.

## Forecast for Sunday 8 November

Possible showers or thunderstorms in the west. Maximum temperatures above average in the west and far north grading to below average elsewhere. Moderate to fresh southeast to northeasterly winds, shifting northwest to southwesterly in the far west.
Cumulative rainfall totals to the end of Sunday: Less than 2 mm about the northern agricultural area increasing to 2 to 5 mm across the southern agricultural area and in the west, with possible falls of 5 to 10 mm about the Lower South East district.

The next routine forecast will be issued at 4:00 pm CDT Thursday.

* Calls to 1300 numbers cost around 27.5c incl. GST, higher from mobiles or public phones.
