South Australia Forecast

Issued at 4:00 pm CDT on Saturday 14 November 2026
for the period until midnight CDT Wednesday 18 November 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A high pressure system centred southwest of WA extends a ridge over most of SA. A cold front is expected to clip the southeast of the state on Sunday. The high will move slowly eastwards during the week. A trough over inland WA will move over SA mid to late next week.

Forecast for the rest of Saturday 14 November

Isolated light showers about the southern agricultural area and near western coasts. Chance of a shower or thunderstorm in the far north late afternoon and early evening. South to southwesterly winds.

Forecast for Sunday 15 November

Isolated showers about southern agricultural area and western coasts, more frequent during the morning. Showers developing in the far west from late morning and isolated thunderstorms developing in the northwest during the afternoon. Maximum temperatures below average. Southwest to southeasterly winds, fresh at times.

Forecast for Monday 16 November

Isolated light morning showers about windward coasts and ranges of the southern agricultural area. Showers and isolated thunderstorms about the northwest and far west. Maximum temperatures below average. South to southeasterly winds, tending southeast to northeasterly in the west, fresh near the coast during the afternoon and early evening.

Forecast for Tuesday 17 November

Showers and thunderstorms in the west. Maximum temperatures below average. Southeast to northeasterly winds, fresh near the coast during the afternoon and early evening.

Forecast for Wednesday 18 November

Showers and thunderstorms in the west. Maximum temperatures above average in the east and near the coast but below average elsewhere. Northeasterly winds and afternoon sea breezes near the coast. Cumulative rainfall totals to the end of Wednesday: mostly less then 2 mm about the southern agricultural area, but isolated falls of 2 to 5 mm are possible. 2 to 10 mm is expected about Eyre Peninsula and eastern parts of the North West Pastoral district. Further west, generally 5 to 15 mm, increasing to 15 to 30 mm in the far west. Local falls of 30 to 60 mm are likely with thunderstorms in the far west and isolated higher falls are possible.

The next routine forecast will be issued at 4:00 am CDT Sunday.
