South Australia Forecast

Issued at 4:00 pm CST on Tuesday 22 September 2026
for the period until midnight CST Saturday 26 September 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A high pressure system centred over the Tasman Sea extends a ridge over SA ahead of a low pressure trough that is expected to move over the far west of SA during Wednesday. The trough will slip southeastwards over southern coasts during Thursday and Friday, before being confined to the west over the weekend.

Forecast for the rest of Tuesday 22 September

Dry and mostly clear. Southeast to northeasterly winds. Afternoon sea breezes near the coast.

Forecast for Wednesday 23 September

Cold at first about eastern districts with patchy frost. Isolated showers and possible thunderstorms developing in the far southwest and in the far northeast corner. Maximum temperatures above average, grading to well above average in the west. Southeast to northeasterly winds ahead of a southwest to southeasterly change in the southwest during the afternoon.

Forecast for Thursday 24 September

Isolated showers and possible thunderstorms in the far southwest and the chance of an isolated shower about southern coasts. Maximum temperatures well above average. Northeast to northwesterly winds ahead of a southwest to southeasterly change in the west.

Forecast for Friday 25 September

Isolated showers and possible thunderstorms in the far southwest and the chance of an isolated shower about southern coasts. Maximum temperatures well above average. Northeast to northwesterly winds, tending fresh at times in the north, tending southwest to southeasterly change about western and southern districts.

Forecast for Saturday 26 September

Isolated showers and possible thunderstorms in the far west and the chance of an isolated shower about southern coasts. Maximum temperatures well above average. Northeast to northwesterly winds, tending fresh at times in the north, tending southwest to southeasterly about western and southern parts. Cumulative rainfall totals to the end of Saturday: Generally less than 2 mm about western parts and southern coasts, with local falls of 2 to 10 mm possible about the far southwest and southern coasts of the Lower South East and Kangaroo Island.

The next routine forecast will be issued at 4:00 am CST Wednesday.
