South Australia Forecast

Issued at 4:00 am CST on Saturday 27 June 2026
for the period until midnight CST Tuesday 30 June 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A high pressure system centred over Tasmania extends a ridge over SA. The high and ridge will move eastwards on Sunday and a low pressure trough is expected to reach the far west of the state on Sunday. The trough will slip southeastwards early next week, followed by a cold front mid week.

Forecast for the rest of Saturday 27 June

Isolated light showers east of the ranges and near southern coasts. Isolated showers developing in the far west. Possible morning fog about the Agricultural Areas and possible patchy frost in the South East districts. Maximum temperatures below average. Northeast to southeast winds, tending east to northeasterly throughout the day.

Forecast for Sunday 28 June

Morning fog patches about eastern districts. Isolated showers possible in most districts, though most likely about western districts. Chance of a thunderstorm about the far west. Maximum temperatures generally below average, though tending to above average in the far northeast. North to northeasterly winds, fresh at times.

Forecast for Monday 29 June

Isolated showers possible in all districts, though most likely about the northeast. Chance of a thunderstorm in the far northeast and Eyre Peninsula. Maximum temperatures near average. Northerly winds, fresh at times, turning westerly in the far west.

Forecast for Tuesday 30 June

Isolated showers possible about central and eastern districts, and developing about the far west later. Maximum temperatures near average though tending to above average above the north. North to northwesterly winds fresh at times.

Cumulative rainfall totals to the end of Tuesday: broadly 2-10 mm. Isolated falls of 10-20 mm are possible about parts of Kangaroo Island and pastoral districts.

The next routine forecast will be issued at 4:00 pm CST Saturday.
