Australian Government Bureau of Meteorology  
South Australia

## South Australia Forecast

Issued at 4:00 pm CST on Sunday 19 July 2026  
for the period until midnight CST Thursday 23 July 2026.

### Warning Information

For latest warnings go to [www.bom.gov.au](http://www.bom.gov.au), subscribe to RSS feeds, call 1300 659 210\* or listen for warnings on relevant TV and radio broadcasts.

### Weather Situation

A high pressure system over Victoria extends a ridge over South Australia, with the ridge expected to weaken during Tuesday. A trough will develop in the west on Tuesday, ahead of a cold front that is expected to extend over southern parts during Wednesday. Another ridge will extend over the west of the state later Wednesday, with a high centre expected to build over the Bight by Thursday evening.

### Forecast for the rest of Sunday 19 July

Dry. Possible fog developing later on and east of the ranges. North to northeasterly winds.

### Forecast for Monday 20 July

Dry. Areas of morning fog on and east of the ranges. Maximum temperatures slightly above average. Northeast to northwesterly winds.

### Forecast for Tuesday 21 July

Dry, apart from a possible late light shower about western Kangaroo Island. Maximum temperatures slightly above average. North to northwesterly winds, shifting southwest to southerly about the west in the afternoon and remaining southern parts during the evening.

### Forecast for Wednesday 22 July

Isolated showers extending to the agricultural districts during the morning, before mostly contracting to coastal areas in the evening. Dry otherwise. Maximum temperatures above average about pastoral districts, tending slightly below average in the agricultural districts. Southwest to southerly winds.

### Forecast for Thursday 23 July

Isolated showers about the southeast and coastal areas. Dry otherwise. Maximum temperatures above average about pastoral districts, tending slightly below average in the agricultural districts. Southwest to southerly winds, fresh at times about the southeast coast and the pastoral districts.

Cumulative rainfall totals to the end of Thursday: Mostly dry until Wednesday, from when totals of up to 5 mm are possible about southern agricultural area and up to 2 mm are possible about northern agricultural areas.

The next routine forecast will be issued at 4:00 am CST Monday.
