South Australia Forecast

Issued at 4:00 am CST on Wednesday 17 June 2026
for the period until midnight CST Saturday 20 June 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A high pressure system centred over the Tasman Sea extends a ridge over eastern parts of SA. A low pressure system south of the Bight will remain slow-moving until later Thursday when it will move southeastwards. An associated cold front will move across SA today followed by a second front later Thursday and Friday. A high pressure system will move across from the west over the weekend.

Forecast for the rest of Wednesday 17 June

Areas of rain and showers, less likely in the far northeast and gradually clearing from the west. Heavy falls possible about western pastoral districts. Showers re-developing about western coasts late afternoon and evening. Isolated thunderstorms in the west and possibly over central districts. Maximum temperatures below average in the far west but mostly near to above average elsewhere. Freshening northeast to northwesterly winds ahead of a westerly change moving over the west later.

Forecast for Thursday 18 June

Rain and isolated thunderstorms becoming confined to the northeast early morning then slowly contracting eastwards. Showers re-developing across the West Coast district then gradually extending over remaining western and central agricultural districts during the day and reaching eastern agricultural districts in the evening. Isolated thunderstorms near western and southern coasts. Maximum temperatures near average about eastern border areas but below average elsewhere. Northwest to westerly winds, shifting west to southwesterly in the west. Strong at times near the coast.

Forecast for Friday 19 June

Showers about western districts and the agricultural area and isolated showers possible about the Flinders district and southern parts of the pastoral districts. Possible thunderstorms near southern coasts early. Maximum temperatures mostly below average. West to southwesterly winds gradually extending throughout. Fresh about the coast.

Forecast for Saturday 20 June

Showers about the agricultural area, possibly reaching southern parts of the pastoral districts and far west. Showers contracting to coastal areas during the evening. Maximum temperatures below average. Southwest to southerly winds tending south to southeasterly later.

Cumulative rainfall totals to the end of Saturday will be highly dependent on the movement of the low: generally 10 to 40 mm grading to 5 to 20 mm northeast of Pukatja/Ernabella to Broken Hill increasing to areas of 40 to 70 mm over parts of the North West Pastoral district, West Coast, Lower Eyre Peninsula, Kangaroo Island and the Mount Lofty Ranges districts.

The next routine forecast will be issued at 4:00 pm CST Wednesday.
