South Australia Forecast

Issued at 4:00 pm CST on Thursday 25 June 2026
for the period until midnight CST Monday 29 June 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A high pressure system centred over Tasmania extends a ridge over SA. The high and ridge will move eastwards on Sunday and a low pressure trough is expected to reach the far west of the state on Sunday. The trough will slip southeastwards early next week.

Forecast for the rest of Thursday 25 June

Isolated showers about parts of the southern coastal districts, over the Nullarbor Plain and about the south of the pastoral districts. Possible isolated thunderstorms about the Flinders district and southern parts of the pastoral districts. East to southeasterly winds, tending northeasterly in the far west.

Forecast for Friday 26 June

Isolated light showers near southern coasts. Isolated showers possible about the Flinders district and southern parts of the North East Pastoral district. Areas of morning fog about the Agricultural Areas and possible patchy frost in the South East districts. Maximum temperatures below average. East to southeasterly winds, tending northeasterly in the far west.

Forecast for Saturday 27 June

Isolated light showers east of the ranges and near southern coasts. Isolated showers developing in the far west. Possible morning fog about the Agricultural Areas and possible patchy frost in the South East districts. Maximum temperatures below average. Northeast to southeast winds, tending east to northeasterly throughout the day.

Forecast for Sunday 28 June

Morning fog patches about eastern districts. Isolated showers possible in most districts. Chance of a thunderstorm in the far southwest. Maximum temperatures below average. North to northeasterly winds, fresh at times.

Forecast for Monday 29 June

Isolated showers possible in most districts. Chance of a thunderstorm in the far northeast. Maximum temperatures near average. Northerly winds, fresh at times, turning westerly in the far west. Cumulative rainfall totals to the end of Monday: mostly less than 2 mm but local falls of 2-5 mm are possible. Isolated falls of 5-15 mm are possible about the West Coast and pastoral districts.

The next routine forecast will be issued at 4:00 am CST Friday.
