South Australia Forecast

Issued at 4:00 am CST on Thursday 6 August 2026
for the period until midnight CST Sunday 9 August 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A trough continues moving across southeast coastal parts of SA Thursday morning. A weak high pressure system centred over western NSW will slowly move east while maintaining a ridge over SA until the weekend. A strong cold front will begin to move into the Bight and track east over the state from Saturday into Sunday.

Forecast for the rest of Thursday 6 August

Patchy morning frost about central and eastern districts and possible fog about the west coast and Eyre Peninsula. Dry, apart from isolated light showers about the Southern Agricultural Area easing in the afternoon. Maximum temperatures near average. East to northeasterly winds, tending southwest to westerly winds in the southeast until the evening.

Forecast for Friday 7 August

Patchy morning frost and fog on and east of the ranges. Dry in the northeast. Isolated showers developing in the far west during the morning, extending eastwards to reach the eastern districts during the evening. Maximum temperatures near to above average. Northeast to northwesterly winds, fresh at times over central SA during the day and coastal areas during the evening.

Forecast for Saturday 8 August

Dry in the far northeast. Scattered showers across much of the state, tending to areas of rain from late afternoon. The chance of a thunderstorm about western and central coastal parts. Maximum temperatures near average in the south, grading to above average in the north. North to northwesterly winds ahead of a fresh westerly change extending across the state from the late afternoon. Strong and gusty winds possible about the west coast in the evening.

Forecast for Sunday 9 August

Areas of rain across the state, tending to showers from the west during the day. Possible small hail with showers about the far west coast. Slight chance of a thunderstorm about coastal districts. Possible raised dust in the far northeast. Maximum temperatures below average. Fresh west to southwesterly winds, but moderating north to northwesterly winds in the southeast until the afternoon. Strong and gusty winds possible inland and extending throughout coastal areas across the state during the day.

Cumulative rainfall totals to the end of Sunday: Less than 2 mm in the far north to northeast. Falls of 2 to 15 mm across the remainder of the northern pastoral districts, increasing 15 to 25 mm about the Agricultural Areas, West Coast district and the south of the pastoral districts and local falls of 25 to 40 mm are possible.

The next routine forecast will be issued at 4:00 pm CST Thursday.
