South Australia Forecast

Issued at 4:00 am CST on Sunday 16 August 2026
for the period until midnight CST Saturday 22 August 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A high pressure system southeast of the state slowly drifts further to the southeast over Tasmania today and is forecast to be located in the Tasman Sea on Monday, while extending a ridge over much of South Australia through to Tuesday. A trough of low pressure over Queensland pushes into the far northeast of SA until Monday, as another trough moves into far southwestern parts later on Tuesday and moves southeast across the state into Wednesday.

Forecast for the rest of Sunday 16 August

Possible morning fog about the far west and southeast and possible patchy morning frost in the southeast. Isolated light showers possible about parts of the Southern Agricultural Area, with showers continuing in the north and west, shifting to the northeast later in the day. Maximum temperatures below average, tending near average about the Southern Agricultural Area. Southeast to northeasterly winds.

Forecast for Monday 17 August

Possible morning fog about the far west and southeast. Showers, tending to rain at times, about the northeast and extending southwest into the Eyre Peninsula throughout the day, with a slight chance of showers reaching further south about Kangaroo Island. Possible thunderstorms about the North East Pastoral and Flinders districts. Maximum temperatures below average in the north, grading to above average about the Southern Agricultural Area. East to northeasterly winds.

Forecast for Tuesday 18 August

Showers possible across all districts, clearing in the west from the evening. Possible thunderstorms about the North East Pastoral and Flinders districts. Maximum temperatures near to above average. North to northeasterly winds, freshening at times in the west, ahead of a west to southwesterly change extending across southern parts of the state from the evening. Winds tending east to southeasterly in the west from the evening.

Forecast for Wednesday 19 August

Showers in the southeast easing by the afternoon and redeveloping in western parts, before extending southeast later. Possible thunderstorms about central and eastern districts later in the day. Maximum temperatures above average, tending near average in the west. Northeast to northwesterly winds, tending south to southeasterly in the west.

Cumulative rainfall totals to the end of Wednesday: Broadly less than 3 mm across the state, increasing to falls of 5 to 15 mm about parts of the Agricultural Areas and parts of the Pastoral and Flinders districts. Isolated local falls of 15 to 30 mm possible about the northeast.

Outlook for Thursday 20 August to Saturday 22 August

Showers across much of the state during Thursday, gradually contracting to the east of the state during Friday before clearing during Saturday. The chance of thunderstorms about the eastern districts. Daytime temperatures below average. Generally southwest to southeasterly winds.

The next routine forecast will be issued at 4:00 pm CST Sunday.
