South Australia Forecast

Issued at 4:00 pm CST on Monday 15 June 2026
for the period until midnight CST Friday 19 June 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A high pressure system centred over the Tasman Sea extends a ridge over the northeast of SA. A low pressure system will develop over the Bight on Monday then will remain slow-moving until later Thursday when it will move eastwards. An associated cold front will move across SA during Wednesday followed by a second front later Thursday. A high pressure ridge will move across from the west over the weekend.

Forecast for the rest of Monday 15 June

Showers about the south of the North West Pastoral district and the West Coast district, tending to patchy rain and extending into central and southeastern districts during the day. Possible thunderstorms in the west, more likely in the far west. North to northeasterly winds.

Forecast for Tuesday 16 June

Areas of rain and showers over western parts and the agricultural area, tending to isolated showers over the Flinders district and the south of the North East Pastoral district. Isolated thunderstorms in the west, possibly reaching western parts of Lower Eyre Peninsula and Kangaroo Island. Maximum temperatures mostly above average. Freshening north to northeasterly winds ahead of a westerly change moving over the far west later.

Forecast for Wednesday 17 June

Areas of rain and showers, less likely in the far northeast and gradually clearing from the west. Showers re-developing about western coasts late afternoon and evening. Isolated thunderstorms in the west and possibly about Yorke and Fleurieu Peninsulas and Kangaroo Island. Maximum temperatures below average in the far west but mostly above average elsewhere. Northeast to northwesterly winds.

Forecast for Thursday 18 June

Rain and isolated thunderstorms becoming confined to the northeast early morning then slowly contracting eastwards. Showers re-developing across the West Coast district then gradually extending over remaining western and central agricultural districts during the day and reaching eastern agricultural districts in the evening. Isolated thunderstorms near western and southern coasts. Maximum temperatures near average about eastern border areas but below average elsewhere. North to northeasterly winds turning west to northwesterly then shifting west to southwesterly in the west.

Forecast for Friday 19 June

Showers about western districts and the agricultural area and isolated showers possible about the Flinders district and southern parts of the pastoral districts. Possible thunderstorms near western coasts. Maximum temperatures near average about eastern districts in the south but below average elsewhere. West to southwesterly winds gradually extending throughout.

Cumulative rainfall totals to the end of Friday will be highly dependent on the movement of the low: generally 10 to 40 mm grading to 5 to 20 mm northeast of Pukatja/Ernabella to Yunta, increasing to areas of 40 to 70 mm over the south of the North West Pastoral district, West Coast district and the southern agricultural area. Isolated higher totals in excess of 70 mm are possible in the west and near southern coasts and ranges.

The next routine forecast will be issued at 4:00 am CST Tuesday.
