South Australia Forecast

Issued at 4:00 pm CST on Saturday 6 June 2026
for the period until midnight CST Wednesday 10 June 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A high pressure system over western NSW will continue to move eastwards to be centred over the Tasman Sea by Monday. Northerly winds freshen over the state on Tuesday ahead of a weakening cold front mid-week.

Forecast for the rest of Saturday 6 June

Light showers about the southern agricultural area, mainly about windward coasts and ranges, contracting to southern coasts during the evening. Maximum temperatures above average in the south and west, grading to below average in the northeast. Northwest to southwesterly winds about the agricultural area, light and variable in the northeast. Winds shifting northerly in the west.

Forecast for Sunday 7 June

Fog patches about central and eastern districts. Mainly dry, apart from isolated light showers about southern coasts during the morning. Maximum temperatures above average in the south and west, grading to below average in the northeast. Light winds in the east at first tending northeast to northerly from the west during the day.

Forecast for Monday 8 June

Isolated fog patches about eastern parts of the northern agricultural area. Mostly dry, apart from possible light showers in the far northeast. Maximum temperatures generally above average. Northeast to northwesterly winds, freshening in the west.

Forecast for Tuesday 9 June

Dry apart from isolated showers developing about the west and the northeast. Maximum temperatures above average. Freshening north to northwesterly winds, shifting west to southwesterly in the far southwest in the evening.

Forecast for Wednesday 10 June

Showers about the west and the agricultural area, easing later. Dry apart from isolated showers developing about the far west and the northeast. Maximum temperatures above average, tending below average in the southwest. North to northwesterly winds, ahead of a cooler west to southwesterly change about western and central parts, extending throughout apart from the far northeast during the day.

Cumulative rainfall totals to the end of Wednesday: Generally less than 5 mm about the southern agricultural area, in the northeast and the southwest. Isolated falls of 2 to 10 mm possible.

The next routine forecast will be issued at 4:00 am CST Sunday.
