South Australia Forecast

Issued at 4:00 pm CST on Wednesday 26 August 2026
for the period until midnight CST Sunday 30 August 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A high pressure ridge over central SA will move slowly eastwards during Wednesday and Thursday. A low pressure trough over WA is expected to extend over the far west of SA late Thursday and Friday. A high pressure system will move across waters to the south over the weekend to be centred over southern Victoria late Sunday.

Forecast for the rest of Wednesday 26 August

Dry. Partly cloudy about the Agricultural Area but mostly clear elsewhere. Light winds in the southeast, tending southeast to northeasterly in the north and west.

Forecast for Thursday 27 August

Possible early morning frost and fog on and east of the Flinders Ranges. Possible morning fog about the South East and Murraylands districts. Dry apart from isolated showers and possible thunderstorms in the far west in the evening. Maximum temperatures above to near average, but below average in the northeast. Northeast to northwesterly winds, tending east to southeasterly in the northeast.

Forecast for Friday 28 August

Possible patchy early morning frost and fog on and east of the Flinders Ranges and about the Murraylands and South East districts. Isolated showers and possible thunderstorms in the far west and the chance of an isolated shower about the South East districts. Maximum temperatures above average in the south but near average in the north. Generally light winds about the Agricultural Area, tending southeast to northeasterly in the north and west.

Forecast for Saturday 29 August

Possible morning fog about the Riverland and Murraylands districts. Dry apart from the chance of a shower or thunderstorm near the western border. Maximum temperatures mostly above average. East to southeasterly winds.

Forecast for Sunday 30 August

Morning fog patches about the agricultural area. Dry apart from the chance of a shower or thunderstorm near the western border. Maximum temperatures mostly above average. Southeast to northeasterly winds. Cumulative rainfall totals to the end of Sunday: less than 2 mm about southern coastal districts. 2 to 5 mm is likely in the far west but local falls of 5 to 15 mm are possible. Isolated falls of 15 to 30 mm are possible near the western border with thunderstorms.

The next routine forecast will be issued at 4:00 am CST Thursday.
