South Australia Forecast

Issued at 4:00 am CDT on Friday 6 November 2026
for the period until midnight CDT Monday 9 November 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A high pressure system over southern SA moves over the eastern states, as a cold front clips the southeast on today. Another high pressure system moves over waters to the south of SA over the weekend, while a developing low pressure system and trough in WA move close to the SA border. The high drifts southeast of Australia as the low moves across SA on Monday.

Forecast for the rest of Friday 6 November

Possible morning fog patches about Eyre Peninsula. Showers about windward coasts, extending across the southern agricultural area during the afternoon and evening. Possible isolated showers or thunderstorms developing about the far west late. Maximum temperatures near to below average about central and eastern districts, grading to above average in the west. Southeast to northeasterly winds in the north, tending light winds in the south. Winds shifting north to northwesterly ahead of a fresh southwest to southeasterly change extending throughout during the afternoon and evening.

Forecast for Saturday 7 November

Possible light morning showers about the agricultural area. Possible showers or thunderstorms in the far west. Maximum temperatures below average, grading to above average in the northwest and far north. Moderate to fresh south to southeasterly winds, shifting east to northeasterly in the west.

Forecast for Sunday 8 November

Possible patchy frost about the southeast. Possible showers or thunderstorms in the west, extending into central districts during the day. Maximum temperatures below average, grading to above average in the west. Moderate to fresh southeast to northeasterly winds, shifting northwest to southwesterly in the far west.

Forecast for Monday 9 November

Possible showers or thunderstorms about the pastoral districts and adjacent areas further south. Maximum temperatures above average. Moderate to fresh east to northeasterly winds, shifting southwest to southeasterly ahead of a trough moving across from the west during the day.
Cumulative rainfall totals to the end of Monday: Broadly less than 2 mm across the state. Falls increasing to 2 to 5 mm about the North West Pastoral and South East districts, with isolated falls of 5 to 10 mm possible about the far northwest and far southeast.

The next routine forecast will be issued at 4:00 pm CDT Friday.
