## **Coastal Waters Forecast for South Australia Gulf Waters**

Issued at 3:30 pm CST on Friday 11 September 2026  
for the period until midnight CST Monday 14 September 2026.

### **Please be aware**

Wind and wave forecasts are averages. Wind gusts can be 40 per cent stronger than the forecast, and stronger still in squalls and thunderstorms. Maximum waves can be twice the forecast height.

### **Warning Information**

For latest warnings go to [www.bom.gov.au](http://www.bom.gov.au), subscribe to RSS feeds, call 1300 659 210\* or listen for warnings on relevant TV and radio broadcasts.

### **Weather Situation**

A high pressure system east of SA extends a ridge across much of the state, as a low pressure trough over the interior of WA weakens overnight. Another trough will approach from the west late on Saturday, move across SA on Sunday with a ridge then extending into the state from a high located southwest of WA. An upper level disturbance will move over the far west on Monday, and a cold front will slip across southern coasts later in the day and early Tuesday. The high will then move across waters to the south throughout the week.

### **Spencer Gulf**

#### **Forecast for Friday 11 September until midnight**

Winds: Variable about 10 knots. Seas: Below 1 metre. Swell: South to southwesterly around 1 metre, increasing to 1 to 2 metres south of Cowell to Wallaroo. Weather: Mostly clear.
