South Australia Forecast

Issued at 4:00 am CST on Friday 24 July 2026
for the period until midnight CST Monday 27 July 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A ridge of high pressure is building over South Australia, with the associated high centre expected to lie over the Bight during Friday and Saturday. The high will move north over South Australia on Sunday, with a trough to build over the west of the State later Sunday ahead of a cold front to move over the Bight late Monday.

Forecast for the rest of Friday 24 July

Morning frost patches about the agricultural area and the south of the pastoral districts. Isolated light showers about the southern agricultural area and West Coast district, mostly contracting to southern coastal districts in the evening. Maximum temperatures below average. West to southwesterly winds in the south, fresh near southern coasts. Southeasterly winds over the pastoral districts, fresh at times in the far north.

Forecast for Saturday 25 July

Patchy morning frost about the northern agricultural area and Flinders district. Showers extending over the southern agricultural area during the morning then becoming isolated during the evening. Chance of an isolated shower about the northern agricultural area. Maximum temperatures below average. Northwest to southwesterly winds in the south, fresh at times near southern coasts. East to southeasterly winds in the north.

Forecast for Sunday 26 July

Morning frost patches about the northern agricultural area and Flinders district and morning fog patches about Eyre Peninsula. Isolated light showers about the southern agricultural area, mostly about southern coasts and ranges. Maximum temperatures near average about southern coastal districts but below average elsewhere. West to northwesterly winds in the south but generally light and variable winds in the north.

Forecast for Monday 27 July

Morning frost patches about the northern agricultural area and Flinders district and morning fog patches about the agricultural area. Dry apart from possible showers about southern coastal districts during the morning and again in the evening. Maximum temperatures below average in the far north but near average elsewhere. North to northwesterly winds freshening in the south.

Cumulative rainfall totals to the end of Monday: generally 2 to 5 mm about the southern agricultural area but falls of 5 to 10 mm are possible about the Mount Lofty Ranges, Kangaroo Island and the Lower South East districts. Totals of less than 2 mm are likely elsewhere.

The next routine forecast will be issued at 4:00 pm CST Friday.
