South Australia Forecast

Issued at 4:00 pm CST on Wednesday 10 June 2026
for the period until midnight CST Sunday 14 June 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A trough will weaken over northern SA tonight as a ridge of high pressure builds again over the state. A cold front will move across the Bight on Friday with a weak high pressure system developing over southern Australia over the weekend.

Forecast for the rest of Wednesday 10 June

Isolated showers and thunderstorms about the North West Pastoral district. Light winds.

Forecast for Thursday 11 June

Dry, apart from isolated showers developing west of about Ceduna in the morning and extending across the southern Eyre Peninsula and Kangaroo Island during the afternoon. Maximum temperatures above average grading to well above average in the north. East to northeasterly winds.

Forecast for Friday 12 June

Showers in the far west, extending over western and central agricultural areas during the evening, possible reaching eastern agricultural districts late evening. Maximum temperatures above to well above average. Fresh northeast to northwesterly winds ahead of a west to southwesterly change moving across the far west late in the evening.

Forecast for Saturday 13 June

Showers across most districts, contracting to eastern and northern districts in the afternoon. Maximum temperatures near average grading to well above average in the northeast. Northeast to northwesterly winds ahead of a south of southeasterly change extending into the North East Pastoral district during the afternoon.

Forecast for Sunday 14 June

isolated showers across the pastoral districts, becoming more frequent about the North West Pastoral and West Coast districts during the day. Maximum temperatures near average grading to above average in the north. Southeast to northeasterly winds.

Cumulative rainfall totals to the end of Sunday: Generally less than 3 mm about the pastoral districts, increasing to 5 to 15 mm south of around Coober Pedy, with isolated falls of 15 to 25 mm possible about the southern agricultural area.

The next routine forecast will be issued at 4:00 am CST Thursday.
