South Australia Forecast

Issued at 4:00 am CDT on Wednesday 21 October 2026
for the period until midnight CDT Saturday 24 October 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A trough of low pressure lingers about the east, before weakening later today, as a slow moving high pressure system in the Tasman Sea will re-establish a ridge across southern parts. A trough is then forecast to briefly move into the west on Thursday, before another trough and cold front move more broadly across SA on Friday and Saturday.

Forecast for the rest of Wednesday 21 October

Showers and possible thunderstorms in the northwest, also possible about central and eastern districts, clearing by the evening. Maximum temperatures above average. Southeast to northeasterly winds, with local afternoon sea breezes.

Forecast for Thursday 22 October

Areas of morning fog in the south. Showers and possible thunderstorms across the north. Thunderstorms may be severe in the far northwest with damaging wind gusts and large hail possible. Maximum temperatures above average, grading to well above average near the coasts. East to northeasterly winds, with local afternoon sea breezes. Winds tending north to northwesterly ahead of a southwest to southeasterly change in the west during the day.

Forecast for Friday 23 October

Showers and possible thunderstorms in the north, developing about central and eastern districts from the afternoon. Maximum temperatures above average, grading to well above average in the south. East to northeasterly winds, tending southeast to southwesterly winds in the far west. Winds then shifting northeast to northwesterly ahead of a southwest to southerly change moving across during the day.

Forecast for Saturday 24 October

Showers and thunderstorms possible across most districts. Maximum temperatures above to near average, grading to below average in the west. South to southwesterly winds, tending north to northwesterly in the far northeast before the change moves across by the evening.
Cumulative rainfall totals to the end of Saturday: 2 to 10 mm broadly across SA. Falls increasing to 5 to 15 mm about the agricultural areas, Flinders Ranges and the far northwest, with isolated totals between 15 to 25 mm possible. Heavier falls up to 40 mm are possible with severe thunderstorms in the southeast.

The next routine forecast will be issued at 4:00 pm CDT Wednesday.
