## South Australia Forecast

Issued at 4:00 pm CST on Friday 10 July 2026  
for the period until midnight CST Tuesday 14 July 2026.

### Warning Information

For latest warnings go to [www.bom.gov.au](http://www.bom.gov.au), subscribe to RSS feeds, call 1300 659 210\* or listen for warnings on relevant TV and radio broadcasts.

### Weather Situation

A cold front in the Bight will move across the south of SA during Saturday followed by a weaker front on Monday. A high pressure system centred near southern WA will begin to dominate the weather pattern across SA mid next week.

### Forecast for the rest of Friday 10 July

Showers about the southern pastoral districts and Eyre Peninsula, extending to central parts of the agricultural area during the evening. Light winds in the north. Northeast to northwesterly winds in the south.

### Forecast for Saturday 11 July

Isolated showers about the North East Pastoral district contracting eastwards to mostly clear by early afternoon. Showers extending across the agricultural area and southern pastoral districts during the morning and early afternoon. Isolated thunderstorms about the southeast coast and western Kangaroo Island. Possible small hail with showers and thunderstorms in the southeast. Maximum temperatures near average, grading to below average about the agricultural area. Freshening north to northwesterly winds ahead of a west to southwesterly change extending across the west and agricultural areas during the day, reaching the far northeast during the evening.

### Forecast for Sunday 12 July

Showers about the southern agricultural area, most likely about westward facing coasts and ranges. Maximum temperatures mostly below average. West to southwesterly winds, fresh about the coasts.

### Forecast for Monday 13 July

Showers about the agricultural area, possibly extending into the south of the pastoral districts. Showers more likely about westward facing coasts and ranges. Maximum temperatures near to below average. Northwest to southwesterly winds, fresh about southern coasts and the southeast. Light winds in the north.

### Forecast for Tuesday 14 July

Isolated showers about the agricultural area. Maximum temperatures near to below average. West to southwesterly winds, easing and tending southwest to southeasterly during the day. Cumulative rainfall totals to the end of Tuesday: Generally less than 2mm across the southern Pastoral districts, increasing to 2 to 5 mm across the northern agricultural area and west coast, increasing to 5 to 15 mm about the southern agricultural area. Higher totals of 15-30mm are possible about the Mount Lofty Ranges.

The next routine forecast will be issued at 4:00 am CST Saturday.
