South Australia Forecast

Issued at 4:00 pm CST on Tuesday 9 June 2026
for the period until midnight CST Saturday 13 June 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A high pressure system over the Tasman Sea is responsible for a ridge hovering over the north of the state. A cold front will slide over the south of SA overnight, while the ridge persists into Thursday. Northerly winds will freshen ahead of a second cold front expected overnight Friday or Saturday morning.

Forecast for the rest of Tuesday 9 June

Showers and isolated thunderstorms in the west with isolated showers extending to central agricultural areas this evening. Freshening north to northwesterly winds, shifting west to southwesterly in the far southwest this evening.

Forecast for Wednesday 10 June

Showers about the agricultural area, contracting eastwards and clearing later. Maximum temperatures near average about western and central agricultural areas grading to well above average across the far north. North to northwesterly winds, shifting westerly about southern districts, easing and becoming light inland later.

Forecast for Thursday 11 June

Dry, apart from isolated showers developing west of about Ceduna. Maximum temperatures above average grading to well above average in the far north. Winds becoming northeast to northerly and freshening in the west.

Forecast for Friday 12 June

Showers in the far west, extending over western and central agricultural areas during the evening, possible reaching eastern agricultural districts late evening. Maximum temperatures above to well above average. Fresh northeast to northwesterly winds extending throughout ahead of a west to southwesterly change moving across the far west late in the day.

Forecast for Saturday 13 June

Showers contracting east and clearing by late evening. Maximum temperatures near to above average grading to well above average in the northeast, and slightly below average in the far west. Cumulative rainfall totals to the end of Saturday: Generally less than 5 mm about Pastoral districts, increasing to areas of 5 to 15 mm about the agricultural area and West Coast district. Isolated falls of 15 to 25 mm possible about southern coasts and ranges and the west coast of Eyre Peninsula.

The next routine forecast will be issued at 4:00 am CST Wednesday.
