South Australia Forecast

Issued at 4:00 pm CDT on Wednesday 11 November 2026
for the period until midnight CDT Sunday 15 November 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A high pressure system lies south of the Bight and will move into the Tasman Sea on Thursday. A low pressure system over Western Australian will move over South Australia on Friday, with an associated trough. A ridge of high pressure will follow and persist into the weekend.

Forecast for the rest of Wednesday 11 November

Dry apart from isolated showers or thunderstorms about the far northwest. South to southeasterly winds, fresh at times near the coast.

Forecast for Thursday 12 November

Showers and thunderstorms about the west and north, showers possibly reaching the Eyre Peninsula in the evening. Thunderstorms may become severe in the far west. Maximum temperatures above average in the east, grading to below average about the west. Southeast to northeasterly winds, tending to fresh northwesterly in the north and west during the afternoon.

Forecast for Friday 13 November

Scattered showers, tending isolated about the far northeast and western coasts. Thunderstorms possible across most districts, becoming more likely in the north and west. Maximum temperature below average in the west, grading to above average elsewhere. Southeast to northeasterly winds across the south and east, winds tending northwesterly ahead of a fresh west to southwesterly change extending throughout by evening.

Forecast for Saturday 14 November

Isolated showers about southern agricultural area and western coasts, possibly extending into the northern agricultural areas and southern pastorals. Isolated thunderstorms clearing from the north. Maximum temperatures above average in the northeast, below average elsewhere. South to southwesterly winds, freshening during the afternoon.

Forecast for Sunday 15 November

Isolated showers about southern agricultural area and western coasts. Showers and thunderstorms developing about the northwest. Maximum temperatures below average statewide. South to southeasterly winds, fresh at times about the coast.
Cumulative rainfall totals to the end of Sunday: Generally, 1 to 5 mm increasing to 5 to 10 mm about the southern agricultural area. 10 to 20 mm west of about Ceduna, with isolated falls of 20 to 40 mm with thunderstorms in the west.

The next routine forecast will be issued at 4:00 am CDT Thursday.
