South Australia Forecast

Issued at 4:00 pm CST on Thursday 2 July 2026
for the period until midnight CST Monday 6 July 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A series of cold fronts will move across the southeast of the state today and tomorrow as a high pressure system starts to move into the Bight. The high will dominate the weather pattern over the weekend as it slowly moves east, reaching the Tasman Sea by Tuesday.

Forecast for the rest of Thursday 2 July

Showers about the agricultural area and southern pastoral districts, becoming more likely in the southeast in the evening. Isolated thunderstorms about the southeast with small hail possible. West to southwesterly winds, fresh and gusty about the south. Winds strong at times about southeastern coasts.

Forecast for Friday 3 July

Isolated showers about agricultural area, most likely in the morning about the Lower South East district. Showers also possible about the far north in the evening. Maximum temperatures below average. Gusty southwesterly winds about the southeastern coastal districts easing during the morning. South to southeasterly winds in the north and west.

Forecast for Saturday 4 July

Isolated light showers about the southern agricultural area, most likely about windward coasts and ranges. Morning fog patches about the south and west. Maximum temperatures below average. South to southeasterly winds.

Forecast for Sunday 5 July

Isolated light showers about coastal parts in the morning. Mostly dry during the day. Morning fog patches about the south. Maximum temperatures below average. Southeast to northeasterly winds.

Forecast for Monday 6 July

Mostly dry. Possible morning frost in the southeast. Maximum temperatures below average. Southeast to northeasterly winds.

Cumulative rainfall totals to the end of Monday: less than 2 mm for southern parts of the pastoral districts, increasing to 2 to 5 mm across the Flinders Ranges and agricultural areas. Isolated totals of 5 to 10 mm are possible about the Mount Lofty Ranges, with more widespread falls expected across the southeast.

The next routine forecast will be issued at 4:00 am CST Friday.
