South Australia Forecast

Issued at 4:00 am CST on Wednesday 9 September 2026
for the period until midnight CST Saturday 12 September 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A high pressure system centred south of WA extends a ridge across the south of SA. The main high centre will move eastwards during the week to be centred to the east of SA on Friday. A trough over the interior of WA will remain stationary for most of the week and may extend into the far west of SA at times. Another low pressure trough will approach from the west on Saturday.

Forecast for the rest of Wednesday 9 September

Showers in the west and isolated thunderstorms in the far northwest. Dry elsewhere apart from isolated light showers about southern coastal districts during the morning. Maximum temperatures above average in the far northeast but below average elsewhere. Southeasterly winds, fresh at times.

Forecast for Thursday 10 September

Cold at first about central and eastern parts with patchy morning frost. Dry apart from isolated showers in the far west. Maximum temperatures above average in the far north but below average elsewhere. Southeast to northeasterly winds, fresh at times near the coast and in the north.

Forecast for Friday 11 September

Patchy morning fog about eastern districts. Dry apart from isolated showers and thunderstorms in the far west. easing throughout the day. Maximum temperatures slightly below average about coastal districts but above average further inland. East to northeasterly winds, tending east to southeasterly in the northeast.

Forecast for Saturday 12 September

Dry. Maximum temperatures above average. Northeasterly winds, tending east to southeasterly in the northeast.

Cumulative rainfall totals to the end of Saturday: Less than 2 mm about southern coastal districts. 10 to 20 mm is likely over areas west of about Ceduna, but local heavier falls of 20 to 50 mm are possible in the west of the North West Pastoral district. Falls of 2 to 10 mm are possible over the remainder of the North West Pastoral but less than 2 mm in the far southeast of that district. Falls of 2 to 5 mm are possible in the far west of the North East Pastoral district.

The next routine forecast will be issued at 4:00 pm CST Wednesday.
