South Australia Forecast

Issued at 4:00 am CDT on Friday 16 October 2026
for the period until midnight CDT Monday 19 October 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A high pressure system moving over the southern Tasman Sea extends a ridge over eastern SA until early next week, while a trough lies through the far northwest, before weakening over the weekend. A cold front is forecast to cross the Bight on Monday, extending a trough over western and southern SA.

Forecast for the rest of Friday 16 October

Showers and thunderstorms in the west, contracting to the far north during the afternoon and clearing during the evening. Mostly dry elsewhere, apart from a light shower or two about the southeast during the afternoon. Maximum temperatures near to above average about western and coastal districts, grading to below average about the northeast. Southeast to northeasterly winds, with local afternoon sea breezes.

Forecast for Saturday 17 October

Isolated showers and possible thunderstorms about the far northwest during the afternoon. Possible showers near the eastern border. Maximum temperatures above average about the south and west, tending near average in the northeast. East to northeasterly winds, with local afternoon sea breezes.

Forecast for Sunday 18 October

Showers and thunderstorms developing in the west during the late afternoon and evening. Possible showers near the eastern border. Maximum temperatures above average, grading to well above average about the west coast and tending near average in the northeast. East to northeasterly winds, fresh at times, with local afternoon sea breezes.

Forecast for Monday 19 October

Showers and possible thunderstorms about the west and south, extending statewide during the day. Maximum temperatures above average. North to northeasterly winds, fresh at times. Winds tending northwesterly ahead of a southerly change moving across the west during the day.
Cumulative rainfall totals to the end of Monday: 2 to 10 mm about the west, with isolated falls of 10 to 20 mm, and the chance of 20 to 40 mm with a thunderstorm. 1 to 3 mm about the eastern border districts. Less than 2 mm possible elsewhere.

The next routine forecast will be issued at 4:00 pm CDT Friday.
