South Australia Forecast

Issued at 4:00 pm CST on Friday 7 August 2026
for the period until midnight CST Tuesday 11 August 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A weak high pressure system centred over NSW will slowly move east while maintaining a ridge over eastern SA until Saturday. A vigorous cold front will move across the west late Saturday then moving across remaining parts of the State on Sunday. A high pressure system moves just to the north on Monday, ahead of another cold front forecast to move across South Australia on Tuesday.

Forecast for the rest of Friday 7 August

Patchy rain and the slight chance of a thunderstorm in the west. Patchy rain extending southeastwards to reach central parts during the evening. Dry otherwise. North to northwesterly winds, fresh at times over western and central parts.

Forecast for Saturday 8 August

Dry in the far northeast. Scattered showers across the state, tending to areas of rain about western and central parts from the late afternoon. The chance of an isolated thunderstorm about western coastal districts, possibly reaching western Kangaroo Island at night. Maximum temperatures above average in the far north and the southwest, grading to below average elsewhere. North to northwesterly winds, fresh at times about coastal parts and in the west, ahead of a fresh to strong and gusty west to southwesterly change moving across the west of the state during the evening.

Forecast for Sunday 9 August

Areas of rain across the state, tending to scattered showers from the west during the day and gradually contracting to the agricultural areas during the evening. Possible gusty thunderstorms about the agricultural area and south of the Pastoral districts. Possible raised dust in the northeast. Maximum temperatures below average, but above average in the far northeast. Fresh north to northwesterly winds in the east at first ahead of a fresh to strong and gusty west to southwesterly winds change extending throughout during the day. Southwesterly winds moderating from the west during the afternoon and evening.

Forecast for Monday 10 August

Possible patchy morning frost about the Flinders Ranges and northwest SA. Isolated showers about the agricultural areas, contracting to windward coasts and ranges, before redeveloping about western and southern coasts during the evening. Maximum temperatures below average. Southwest to northwesterly winds, fresh about central and eastern coasts and ranges during the morning.

Forecast for Tuesday 11 August

Possible morning frost about the northern agricultural area and parts of the Pastoral districts. Scattered showers about the agricultural area, with isolated showers extending into the south of the Pastoral districts. Possible thunderstorms about windward coasts and ranges. Maximum temperatures below average. Freshening north to northwesterly winds ahead of a fresh to strong and gusty west to southwesterly change extending eastwards during the day.

Cumulative rainfall totals to the end of Tuesday: Falls of 5 to 15 mm across much of the state, increasing 15 to 30 mm about the agricultural areas, Eyre Peninsula, Flinders Ranges and south of the Pastoral districts, and increasing further to 25 to 50 mm about western facing coasts and ranges. Local falls of 40 to 70 mm are possible about the Mount Lofty Ranges, Flinders Ranges and with thunderstorms. Less than 2 mm about the far northeast.

The next routine forecast will be issued at 4:00 am CST Saturday.
