South Australia Forecast

Issued at 4:00 am CDT on Wednesday 28 October 2026
for the period until midnight CDT Saturday 31 October 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A high pressure system south of the Bight extends a ridge over southern parts of the state. The high will drift eastward over the coming days, clearing east of Australia from Thursday. A trough and low pressure system are then forecast to track into western SA on Thursday, crossing the rest of the state on Friday, and then clearing the east early Saturday.

Forecast for the rest of Wednesday 28 October

Early morning fog possible on and east of the Mount Lofty Ranges. Possible isolated light showers about the southeast. Showers and possible thunderstorms continuing in the north and west. Maximum temperatures near to below average. Southeast to easterly, tending southwest to southerly in the southeast and east to northeasterly in the west later.

Forecast for Thursday 29 October

Showers and thunderstorms possible about much of the north and west, extending into central parts. Thunderstorms possibly severe in the far west with risks of damaging wind gusts, large hail and heavy rainfall. Maximum temperatures near to above average about coastal districts, grading below average in the north. East to northeasterly winds, tending north to northwesterly in the west, fresh at times.

Forecast for Friday 30 October

Showers and thunderstorms, mainly through central parts, clearing from the west during the day. Maximum temperatures near to above average. North to northwesterly winds shifting southwesterly from the west during the day

Forecast for Saturday 31 October

Showers about the agricultural areas. Sunny and dry inland. Maximum temperatures near to above average. Southwesterly winds.
Cumulative rainfall totals to the end of Saturday: 2 to 10 mm across the agricultural areas, and most of the east. Falls increasing broadly to 10 to 20 mm in the north and west, with localised falls of 20 to 30 mm possible. Heavier falls between 20 to 50 mm are possible with thunderstorms particularly in the northwest.

The next routine forecast will be issued at 4:00 pm CDT Wednesday.
