South Australia Forecast

Issued at 4:00 pm CST on Thursday 18 June 2026
for the period until midnight CST Monday 22 June 2026.

Warning Information

For latest warnings go to www.bom.gov.au, subscribe to RSS feeds, call 1300 659 210* or listen for warnings on relevant TV and radio broadcasts.

Weather Situation

A low pressure system south of the Bight will drift to the south east while a trough extends across western coasts late on Thursday. This trough will linger along the coastline into Friday, developing into the cold front that will clear into the east early Saturday. A high pressure system will begin to move in from the west on Saturday, cross the Bight, slowly drifting to eastern SA by Monday.

Forecast for the rest of Thursday 18 June

Rain clear in the far northeast corner while scattered showers developing from the west, extending into central districts in the evening. Isolated thunderstorms possible West Coast and southern Eyre Peninsula. Northwest to westerly winds, shifting west to southwesterly in the west. Strong at times near the coast.

Forecast for Friday 19 June

Showers about western districts and the agricultural area with isolated light showers reaching the Flinders and Pastoral districts, contracting to the southern agricultural area and easing by evening. Possible thunderstorms near southern coasts early. Maximum temperatures mostly below average. West to southwesterly winds gradually extending throughout, fresh about the coasts.

Forecast for Saturday 20 June

Isolated showers mainly about the southern agricultural area, with a slight chance of light isolated showers reaching the southern pastorals and the west. Maximum temperatures below average. Southwest to southerly winds tending south to southeasterly later.

Forecast for Sunday 21 June

Isolated showers about windward coasts and the far south east. Areas of morning fog inland with patchy frost about parts of the Mid North and southern Flinders. Maximum temperatures below average. Light winds.

Forecast for Monday 22 June

Light isolated showers possible about the southern coastal fringes, otherwise mostly dry. Maximum temperatures below average. Light winds.

Cumulative rainfall totals to the end of Monday: 5-10 mm in the far northeast corner of SA this evening with less than 2 mm elsewhere for the pastoral districts. 1-5 mm for the Northern Agricultural Areas, increasing to 5-15 mm across the Southern Agricultural Areas, West Coast and Mid North, higher isolated totals of 15-25 mm about windward coasts and the Mount Lofty Ranges, localised falls of 30mm possible with thunderstorms.

The next routine forecast will be issued at 4:00 am CST Friday.
